12/10/71

Harold,

This Ford stuff is fascinating. Was the UPI story 11/21/71? and when was the police report sent to you?

The part I didn't discuss with you on the article is something I'd rediscussed with you before — the changed location of the head wound in the context of Epstein's reliance on the Panel Report. I give you full credit both in the text and in a footno The reason I didn't bring it up is that with yo is that I'd like you to see it in the context of th completed article. Because both Lyons and Tu wrote the Times about it I think it is essential to the Epstein piece. As I said before, if you insist when you see the finished product that I take it out, I will.

Peace,
Jerry.
